Breathable Anti-Slip High Build Coating

**FeRFA Type 3 System**

DFT = 300 - 600µ

**Typical Environment**

- Light Loads
- Moderate Loads
- Increased Loads
- Heavy Loads

**System Properties:**

- Slip resistant
- Easy to clean

- Even finish
- No sand required

- Water based
- Tough and colourful

- Damp tolerant
- VOC Free

- Overcoat most existing paints
- Good opacity

- Economic
- Smooth surface

- Matt or silk gloss
- For mineral surfaces

**Suitable for Surfaces**

- Clean concrete without surface sealer
- Prepared concrete and screeds
- Well adhered existing coating, subject to trial.
- Surfaces prepared by hand grinding
- Suitably prepared walls.

**Total**

**Notes:**  
Application rates and coverage are theoretical and do not allow for surface profile variation, wastage or variation in application technique. In the case of high substrate roughness you should allow for additional levelling material to be used.
